Architect

Ralph Belton, RA
Senior Architect / Mapping

The objective of this adaptive re-use project was to stabilize an existing vacant commercial building and refit it for public use. This Visitor's Center and Museum project was programmed to provide an opportunity for guests to become oriented to the rich maritime history and legacy of the Port Town of Bladensburg, Maryland. The facility was also planned to serve as a part of the local area's historic sites walking tour.

Site Plan of Former Roy Rogers' restaurant along Annapolis Road.

West Elevation of proposed renovation of existing Roy Rogers restaurant into the Town of Bladensburg's Welcome Center and Maritime Museum.
